

¿WHAT TO DO IF I DETECT UNUSUAL ACTIVITY IN MY ACCOUNT?

1

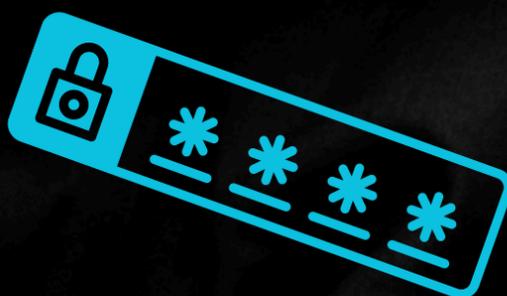

DON'T IGNORE WHAT YOU SEE

If you notice any unusual activity or changes you didn't make, proceed with caution until proven otherwise. It's better to be safe than sorry.

CHANGE PASSWORDS

Update it immediately. Make it unique, long, and don't reuse old passwords.

2

3

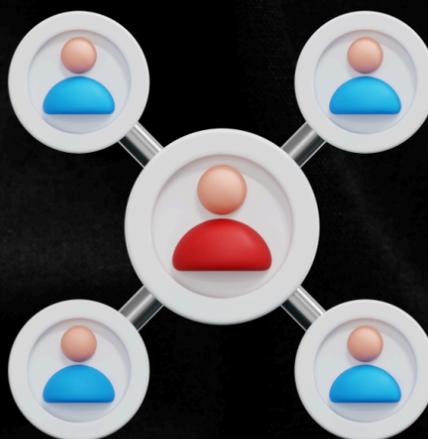

ACTIVATE THE MFA

Double factor = double peace of mind. Even if someone has your password, you can stop the theft here.

REVIEW SESSIONS AND ACCESS

Close any active sessions you don't recognize and verify locations, devices, and access times. Anything that doesn't seem right, get rid of it.

4

5

REPORT THE INCIDENT

Report any situation you notice to your relevant department. The faster they act, the less impact it will have.

**Safety is not paranoia, it's prevention.
Acting quickly protects your account, your
information, and the entire transaction.**
