Enjoy cookies
in a safe way

Cookies are small text files that are stored on your computer when you visit a website.

Cookies themselves are harmless. However, it is possible for attackers can find vulnerabilities in websites and exploit them to steal or manipulate the stored information, so we share with you how you can protect your information from cookies.

DON'T ALLOW TO REMEMBER PASSWORD

Don't let websites remember your passwords. The risk of such a feature outweighs the convenience.

BE SELECTIVE

Many websites ask you to allow or reject cookies. Some even have an option to allow cookies for functional purposes, which is usually the best option.
