

CLOUD vs USB

¿WHERE TO STORE YOUR
INFORMATION MORE SECURELY?

CLOUD

Automatic backups.

Lower risk of loss.

Access from anywhere
and on any device.

Allows real-time
collaboration.

USB

It is easily lost and
vulnerable to malware.

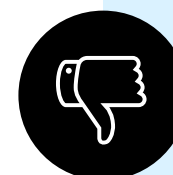

It only works if you
carry it with you.

If it is damaged or lost,
everything is lost.

Limited technology,
no improvements.

THE CLOUD DOESN'T JUST STORE YOUR FILES, IT PROTECTS
YOUR BUSINESS. ¿HAVE YOU MIGRATED YET?
