

¿WHAT IF YOU LOSE YOUR FILES TOMORROW?

Learn about the different types of backups.

1. LOCAL BACKUP

You store your data on a physical device close to you, such as an external hard drive, USB drive, or local server.

2. CLOUD BACKUP

Your files are stored on remote servers over the internet (such as Google Drive, OneDrive, Dropbox).

3. ENCRYPTED BACKUP

Your data is protected with encryption algorithms before or during backup, whether local or in the cloud.

Final advice:

**Don't choose just one!
Combines the best of each
type:**

**Local + Cloud + Encryption =
Complete protection**
